**Faculty of Pharmacy**

(School of Pharmaceutical Sciences/Pharmacy Academy)

**Course: Pharma Marketing and Sales**

**Course Code: PHVAC01**

Pharma Marketing and Sales outlines a confluence of dynamics that lead to a new marketing and sales system with a smaller, more agile and smarter sales force. Pharmaceutical Companies will need to demonstrate that their brand adds value to patients. They will have to offer a package of products & health services that the market not only wants but is also willing to pay a premium for. This course highlights some very strong facts related to the need for Pharma to change its marketing and sales functions to sustain future growth and performance.

The major goal of this course is to help professionals build relevant marketing and sales skills. Marketing strategy, market research, sales process, communication skills, planning, and other topics will be covered in this course.

## **Course Objectives**

Upon completion of this course, the student should be able to:

- Develop various activities such as advertising, sales promotion, market research, physical distribution, and product merchandising.
- Develop a relationship with healthcare professionals.
- Understand daily call report methods and digital pharmaceutical marketing and sales.

The training will be done using lectures and power point slides and videos whenever available.
