CONCEPT, NEED AND CHALLENGES OF INCLUSIVE EDUCATION IN INDIA

Dr. Mohan Lal 'Arya'*

Abstract

Inclusive Education (IE) is a new approach towards educating the children with disability and learning difficulties with that of normal ones within the same roof. It brings all students together in one classroom and community, regardless of their strengths or weaknesses in any area, and seeks to maximize the potential of all students. It is one of the most effective ways in which to promote an inclusive and tolerant society. It is known that 73 million children of primary school age were out of school in 2010, down from a high of over 110 million out-of-school children in the mid-1990s, according to new estimates by the UNESCO Institute for Statistics (UIS). About Eighty percent of Indian population lives in rural areas without provision for special schools. It means, there are an estimated 8 million children out of school in India (MHRD 2009 statistics), many of whom are marginalised by dimensions such as poverty, gender, disability, and caste. Today, what are the needs and challenges for achieving the goal of inclusive education? How will an inclusive environment meet the needs of children with disabilities? How quality education can be effectively and efficiently delivered for all children? Therefore, inclusive schools have to address the needs of all children in every community and the central and state governments have to manage inclusive classrooms. Keeping in view these questions, this article discusses in detail the concept of inclusive education, including importance,
