ABOUT THE FDP

Pharmaceutical Sciences is a very extensive and rapidly expanding field that involves not only the preparation, dispensing, production, container and label development of drugs, dosage forms, medical devices, biological, cosmetics, etc., but also the regulations for the manufacture, sale, export, and import of these medicinal products. A pharmacy professional should therefore not just be competent and diligent, but also compassionate, devoted, ethical, innovative, and entrepreneurial. Pharmacy professionals work in pharmaceutical marketing, retail pharmacy, production and analysis of drug/plant-based medicines/food, clinical trials, regulatory affairs, defence services, railways, public or private hospitals, food and drug administration, or become entrepreneurs. Creative pharmacists enter the cosmetics and pharmaceutical packaging industries. This occupation provides not only a work or a career, but also a purpose in life.
