About the Book

Almost every element of 21st-century living is impacted by technology, from communication through security to transportation efficiency as well as safety to food availability, access to financial services, healthcare, sociability, but also productivity. These days, all it takes is a few mouse clicks to get the information you want. Pull out your phone, PC, or even your smart home assistant to get the answer. Fitness gadgets have also become more popular as a new technological trend.

A vast variety of technical innovations have helped us use our spare time, from video as well as computer games to the smart TVs. Even today, going to the movies doesn't have to take place in a movie theatre. In the same way that we use computers to read, we use digital platforms to view movies. There is a shift in an entertainment industry toward total digitalization thanks to online streaming platforms as well as mobile apps.

Computers, virtual reality, augmented reality, as well as e-learning have showed us how to cross the limitations of time and location. Today, one individual in India may study from Harvard or MIT, even from the comfort of their own home, thanks to the online educational systems. This Book is based on fundamental knowledge of such computer technology aspects that brings wide changes to our living style. This Book is completed with six chapters in which first chapter introduces the very basics of computer and the next chapter will give information about its organization & architecture. Third and fourth chapters focuses on the computer memory and about input & output media. Last two chapters explain you about the operating systems.
